

ABSTRACT

A method, apparatus, and computer program product for transforming information.

The method includes: inputting, into an editor, a first structural description of a first structured format; inputting, into the editor, a second structural description of a second structured format; inputting, into the editor by a user, preferences for transforming an element of the first structural description to at least one element of the second structural description; storing translation information output from the editor, the translation information comprising at least the preferences input by the user; and transforming first information provided in the first structured format into second information in the second structured format based on the translation information.
